INNOVATIVE MFC & MDF MELAMINE PANELS

An Cuong is a pioneering force in the production of wood-working materials and melamine-faced chipboards with an extensive variety of sizes, types, decors, and textures. Our market leadership is attributed to our relentless pursuit of innovation, competitiveness, and quality enhancement at every stage of production. This is facilitated by continuous investments in cutting-edge technology and commitment to researching new and trendy decorations and textures. Notably, An Cuong's recent introduction of unique press-plates has further strengthened its position as a trailblazer in the industry.

MFC[®]

Melamine Faced Chipboard

Melamine Faced Chipboard, also known as MFC, is popularly used to make wood products such as furniture. It is made with thick carcass panels that give you superior-screw holding strength, excellent machinability and a smooth surface finish. MFC is generally made of real wood grain that is repeatedly printed onto a melamine film and processed under extreme heat onto a sheet of chipboard.

The quality of the chipboard generally depends on the density of the board – between 18mm and 25 mm. Melamine laminate sheets are crafted to add beauty and perfection to spaces. Available in an array of designs and finishes, this versatile material is widely used in both residential and commercial spaces such as kitchens and retail stores for cabinets, shelves, partitions and office furniture.
